

Senior Front-End Software Developer

Job Description

Solutional is fast-growing, profitable, software development company headquartered in Beaverton, OR. We are involved in multiple, multi-year, development projects, and are made up a team of experienced, smart people.

We work with clients to understand the products they offer, and then work with them to perfect their strategy, refine their technology, and take their product to market. Solutional's results are driven by our great people who have proven experience, using excellent processes, and we specialize in helping our clients and partners rapidly develop strategies, teams, and products that enable growth and profitability.

Solutional has an established UX and UI practice, with customers relying on us to design beautiful, functional, and efficient solutions. **We are looking for an experienced Front-End Software Developer to join our team** to execute on the build out of the Front-End of the web and mobile application for our unique SaaS solution aimed at the B2B and B2C market segments.

This role requires a candidate with a proven track record in execution and ability to collaborate with UI/UX stakeholders, product architects and other software developers to realize a best-in-class user experience in the SaaS product.

Responsibilities

- Front-End Design Realization
 - Work with stakeholders including business, product, and UX team members, to define the Front-End web and mobile design for the product
 - Provide input to direction for component choices for the application, including collaborating with Back-End team member to ensure the technical feasibility of the UI/UX design
- Software design and development of the SaaS Front-End implementation through the entire SDLC to produce and maintain high-quality products
- Execute in a hands-on capacity on the Front-End design and coding efforts
 - Work collaboratively with designers and developers to successfully deliver the product
 - Work with others on the development team using analytical and problem-solving skills
 - Utilize best practices in product development efforts
- Communicate status, issues, and results to internal stakeholders

Project Experience

- Proven experience in software development – with special preference to SaaS product experience
- Senior-level contributor able to work independently
- Recognize and resolve ambiguous or conflicting objectives
- Demonstrated problem solving and troubleshooting skills

Personal Skills

- Communicate effectively in person and in writing
- Exercise a commitment to quality and accuracy at a level appropriate to the product development
- Handle multiple time demands in an interrupt-driven environment

Qualifications

- Bachelor's or Master's Degree in Computer Science or equivalent, or the equivalent work experience
- 10+ years proven experience in Front-End software development across all phases of the SDLC
- 3+ years of experience managing successful web / mobile application development projects
- Demonstrates a high level of professionalism

Skills

The person filling this role at Solutional will be collaborating on, and leading the Front-End development effort for the product. While the role is primarily Front-End focused, a working knowledge of Back-End architecture and related technologies is expected.

- Front-end
 - JavaScript, HTML5, CSS3
 - Mobile and Responsive Front-End development
 - Front-End Framework & library experience (React/Polymer/D3)
 - Understanding and application of UI and UX design principles
 - Maintain and implement style guides, standards and best practices for client-side implementation
- Other Desired Technical Skills
 - Experience in MVC frameworks
 - Proven superior programming skills: Write, test, and debug code
 - Flexibility on programming language use
 - Git revision control
 - Experience with native Mobile Development: iOS or Android apps is a plus
- Self-directed with the ability to work in a dynamic environment focused on schedule-driven product development
- Excellent analytical and problem solving skills
- Excellent communication skills, both verbal and written, as well as excellent listening, presentation and interpersonal skills
